

Remarks

This paper is being filed in view of further amendments being tendered to the Patent and Trademark Office for consideration. The previously-unentered response that was received by the Patent and Trademark Office on June 3, 2005 has now been entered, and the amendments above further amend the claims, and so that the Examiner will understand the relationship between prior claims 65 through 109 and new claims 110 through 153, the following claim chart is provided for the record:

All but former claims 74 and 75 have been amended in some manner, but the new claims correspond directly to their former claims as identified in the above claim chart. While some of the changes are fairly comprehensive, the changes address essentially drafting and editorial matters, rather than substantive matters. The comments regarding the patentability of the claims as set forth in the now-entered June 3, 2005 response still apply.

In view of the foregoing, further and favorable reconsideration of the application is urged.
